

DATA ENGINEER SUMMARY

- **Data Engineer with over 2.5 years of experience** specializing in **data pipeline** development, **data warehousing**, and big data technologies.
- Proficient in **SQL, data analysis, machine learning, and cloud computing**, with demonstrated success in optimizing data infrastructure performance and enabling strategic decision-making through innovative data solutions.

EDUCATION

Master of Applied Computer Science, Computer Science
CONCORDIA UNIVERSITY (CU) | January 2023 – August 2024
GPA: 3.7

Bachelor of Engineering, Computer Engineering
GUJARAT TECHNOLOGICAL UNIVERSITY (GTU) | June 2018- May 2022
CPGA: 9.50

EXPERIENCE

Machine Learning Engineer | BRAINYBEAM TECHNOLOGIES PVT. LTD. | *January 2022 – December 2022*

- Engineered data pipelines to streamline data integration and management for real-time and batch data processing.

Achievements: Optimized data-driven decision-making and operational efficiency by improving model training efficiency by 25%, reducing overfitting by 30%, and enhancing overall system performance.

Data Analyst | ECUBIX | *June 2021 – November 2021*

- Spearheaded ETL processes for a product-based Medical Reporting System, extracting, transforming, and loading CRM and sales data from diverse sources, and leveraging data modelling and visualization techniques.

Achievements: Employed advanced statistical analysis techniques, performed exploratory data analysis, and implemented predictive modeling to identify customer behavior patterns and market trends, resulting in a 20% increase in customer acquisition and a 15% boost in revenue.

Python Developer Intern | Bascom Bridge Education Pvt. Ltd. | *January 2020 – December 2020*

- Developed and refined Python applications, using complex programming techniques to solve intricate coding challenges and enhance software functionality.

Achievements: Achieved a 32% increase in algorithmic efficiency by implementing sophisticated Python programming strategies, markedly enhancing the performance of software solutions.

TECHNICAL SKILLS

- **Programming Languages and Databases:** Java, Python, R, C++, SQL.
- **Big Data & Distributed Frameworks:** Hadoop, Spark, Kafka, Flink.
- **Databases and Data Warehousing:** MySQL, Oracle, MongoDB, Snowflake, Apache Druid, Flume, Query Optimization
- **Cloud Platforms:** AWS, Azure, IBM, GCP, Databricks
- **Data Science and Machine Learning:** Deep Learning algorithms, Keras, PyTorch, TensorFlow, NLP, Neural Networks
- **DevOps & CI/CD:** GitHub, Jenkins, Terraform, Docker, Kubernetes
- Image Processing, ETL Tools, Linux, Performance Tuning, Prompt Engineering

PROJECTS

STOCK MARKET DATA STREAMING PIPELINE WITH KAFKA AND AWS

- Integrated a high-throughput real-time stock market data pipeline using Apache Kafka and AWS, enhancing data analysis efficiency by 50% through automated cataloging with AWS Glue and scalable SQL queries with AWS Athena.

FOOTBALL DATA ANALYTICS WITH AZURE AND APACHE AIRFLOW

- Automated data cleaning, and transformation for football analytics using Apache Airflow and Azure Data Lake, saving 30 hours/week and streamlining integration with Databricks, Power BI, and Tableau.

GCP-BASED SCALABLE DATA PIPELINE FOR UBER TRIP ANALYTICS

- Constructed a scalable Uber data analytics pipeline on GCP, delivering deep insights into trip patterns and fare distribution through advanced integration of Python, Mage, BigQuery, and Looker Studio.

REDDIT DATA ENGINEERING PIPELINE

- Crafted an innovative ETL pipeline leveraging Apache Airflow, Celery, AWS services, boosting data processing efficiency by 40% and generating actionable insights into trends through advanced integration with Redshift.
